LISBON  
ENERGY  
SUMMIT &  
EXHIBITION  
2023

Officially endorsed by the Portuguese Ministry of Environment and Climate Action, the Lisbon Energy Summit & Exhibition will take place in Portugal, a world leader in new energies and technological innovation.

The Lisbon Energy Summit 2023 is the largest annual gathering in Europe of energy leaders, convening under the Ministry for Environment and Climate Action of Portugal. The high-level ministerial panels will unpack which green finance initiatives hold the potential to accelerate the transition and support renewable technology development, and which market reforms will aid substantial green investment in Europe. The Lisbon energy summit will bring together energy ministers, senior stakeholders and investors to address critical issues of European prosperity and the transition to clean energy and energy security. Energy leaders across the value chain will define the future of energy systems, map out the net zero business and governance pathways and present leading technologies and solutions to accelerate the energy transition.

# Accelerating An Equitable, Sustainable & Secure Energy Transition

The Lisbon Energy Summit will gather all major stakeholders from across the globe to address the next generation energy systems. The summit will focus on the transformation of existing energy sources and host global cross-sector collaboration by convening global policy makers, regulators, energy producers and investors to discuss roadmaps to deliver collective, decarbonised, and cost-effective energy security.

## Balancing Energy Security Against Net-Zero Targets

To ensure a successful energy transition and to meet net-zero ambitions, it is critical to enable optionality in energy sources and low-carbon renewable technologies. Solar power, onshore and offshore wind, biofuels, hydrogen, and renewable gasses are all pulling together to meet today's energy supply and demand challenges.

## Mobilising Investment To Secure A Low Carbon Economy

Fiscal support from governments and the rise of sustainable finance has advanced power sector investment in renewables, grids, and storage. By addressing key risks and barriers, public finance, including sustainable finance, plays a vital role in bridging the financing gap and attracting further investment from the private sector to renewables. Institutional investors, such as pension funds, insurance companies, endowments, and sovereign wealth funds, have the potential to scale up major investments.

## The Role Of Digitalisation In The Future Of Energy

AI, remote sensing, and cloud computing technology are all proving their value to the energy transition in multiple domains, driving measurable improvements in renewable energy forecasting, grid operations and optimisation and acting as a security enabler. The role of digitalisation in reducing the net-carbon footprint is imperative, as is the subsequent data capture and reduction of emissions along the value chain.

## Decarbonisation Of Hard To Abate Sectors

A lower carbon future requires critical measures to overcome mitigation barriers in hard-to-abate sectors. The most important ones include technological advancements, structural changes within mobility, industry, and buildings sectors. The pathways for decarbonising these industries will require the adoption of hydrogen and Carbon Capture Utilisation and Storage technologies to show the immense potential to reduce emissions.

## Fuelling The Energy Transition And The Role Of LNG & Gas

LNG and gas will function as a critical vector of the energy transition and play a significant role in meeting the world's need for reliable energy. Carbon neutral LNG is increasingly becoming a necessity due to market and regulatory demands. There is growing pressure on the market's leading players to reduce emissions across the LNG supply chain and in the long term methane emissions from oil and gas production will become regulated. Verified transparent, and third party-audited natural gas certification schemes will incentivise and accelerate the market's demand for cleaner energy.

## Investing In The Next Generation Of Talent

The success of the energy transition will depend on human capital. In the wake of a skills gap and growing clean energy job market, in the years ahead, the focus will be on upskilling, reskilling, and adapting the transferrable skills from other industries. Energy brands recognise the challenges they face in recruiting talent and connecting meaningfully with potential recruits. Attracting the next generation workforce is possible when brands take more responsibility for their place in the world and show a positive contribution to deliver net zero targets.

We are delighted to be working with and guided by respected international energy leaders in the curation of all content streams across the 3-day event. Programs designed to help drive forward the energy transition and confront the most business-critical challenges that our industry is facing together.

## Introducing Our Advisory Board

**Nelson Lage**  
Chairman of the  
Board of Directors  
**Adene**

**Jose Roque**  
Partner  
**EY**

**Rui de Oliveira Neves**  
Partner  
**Morais Leitão**

**Uwa Airhiavbere**  
Practice Lead,  
WW Oil & Gas  
**Microsoft**

**Ricardo Martinho**  
President  
**IBM Portugal**

**Teresa Ponce de Leão**  
President  
**LNEG**

**João Manso Neto**  
CEO  
**Greenvolt Group**

**Christian Synetos**  
Director  
**BlackRock**

**João Torres**  
Chair  
**Associação Portuguesa  
da Energia**

**José Queirós de Almeida**  
CEO  
**GreenVolt Communities**

**Maria Marta Gerales**  
Head of External Affairs  
& Stakeholders Corporate  
Global Unit  
**EDP**

**António Comprido**  
General Secretary  
**Apetro**

**Ferry Franz**  
Director, Head of Hydrogen  
Affairs Europe  
**Toyota Motor Europe**

**Youqing Ma**  
Commercial Counselor  
**U.S. Department of  
Commerce (USDOC)**

**Adriana Reais Pinto**  
Advisor  
**International Cooperation  
For Energy Transition**

**Pedro Amaral Jorge**  
CEO  
**APREN**

**Ana Silveira**  
Head of External  
Relations & Regulation  
**Galp**

**Pedro Ferreira**  
Strategic Consultant  
**FELPT**

# Our Distinguished Speakers

We are delighted to present to you a snapshot of some of our expert speaker line-up. Providing talks and discussions of the highest calibre, our 3-day programme covers the current challenges affecting the global energy system - the geopolitical shifts alongside the evolving global economy, energy supply and next generation energy solutions with a view to accelerating the energy transition and the journey towards achieving net-zero commitments.

**H.E. Duarte Cordeiro**  
Minister for Environment  
& Climate Action  
Portugal

**H.E. João Galamba**  
Minister for  
Infrastructure  
Portugal

**Ana Fontoura Gouveia**  
Secretary of State for  
Energy & Climate  
Portugal

**Filipe Crisostomo Silva**  
CEO  
Galp

**Miguel Stilwell  
d'Andrade**

# Why Portugal?

## A World Leader in New Energies & Technological Innovation

### Carbon Neutrality

Portugal's energy and climate policy is to push for carbon neutrality, primarily through broad electrification of energy demand and a rapid expansion of renewable energy generation.

### Renewables

Renewables covered 54% of the electricity generation and there is high use of bio energy in industry and buildings.

### Sustainable Energy

The government will provide financing for sustainable energy projects through the European recovery and resilience plan.

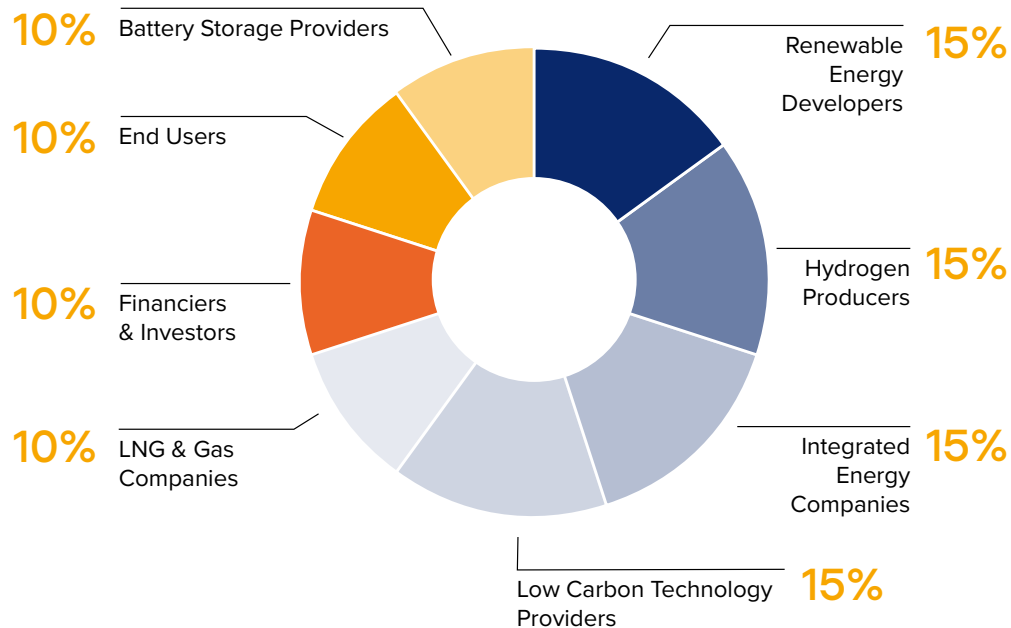

### Energy Transition

Portugal aims to accelerate its energy transition and increase the proportion of renewable sources by 20% points to 80% of its electricity output by 2026, four years earlier than previously planned.

# Who You Will Meet

The Lisbon Energy Summit is a global platform with the power to convene industry leaders annually in their mission to drive forward the energy transition and provide low-carbon, affordable energy for all. An important enabler of engagement between policy-makers, business leaders, disruptors and innovators, The Lisbon Energy Summit will spark conversations, collaboration and connections that address key challenges and opportunities created by energy transformation.

## Audience Profile

## Geographical Breakdown

# Bringing Together Key Industry Leaders

## Energy Producers

IECs, IOCs, NOCs and Renewable Producers currently leading the energy transition, prioritising decarbonisation and developing cleaner portfolios.

## Policy Makers

Regional, National and Supra-National Governments involved in delivering the energy transition, improving accountability, and enforcing climate and emissions laws.

## Technology & Services

Consultants, Technology Companies, Contractors and Service Providers responsible for the delivery of the new energy ecosystem, driving down emissions and improving efficiencies.

## End Users

Industry, Utilities, Transport and Manufacturing consumers acting on shareholder and investor pressures to deliver sustainable, lower-carbon energy consumption and end-use.

## Investors

Institutional, Impact, Venture Capital, Pension Fund and Sovereign Wealth Funds looking to demonstrate their position as active contributors to change in the energy paradigm.

## Civil Society

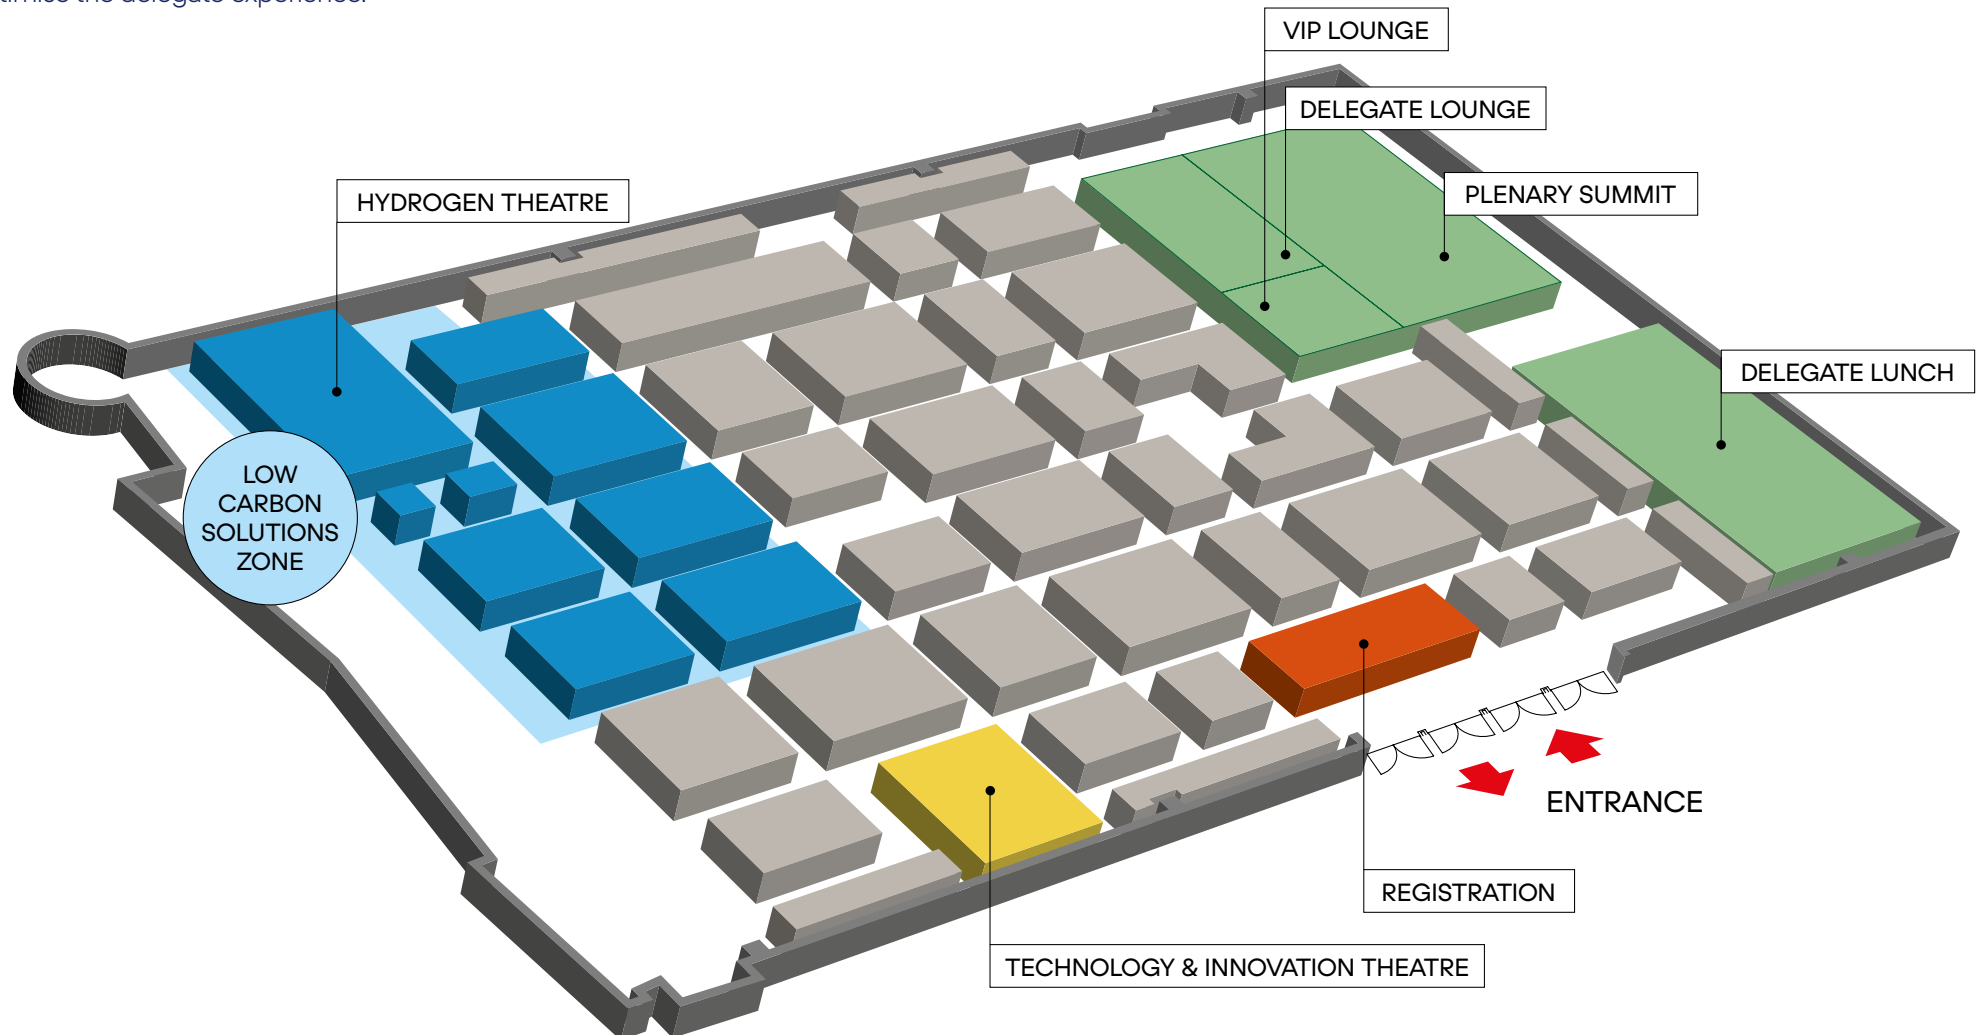

NGOs, Academia and Foundations representing the interest of society as a whole.

# The Lisbon Energy Summit 2023 Floor Plan

With over 250 exhibitors, Lisbon Energy Summit will showcase new global products, solutions and technologies across the natural gas, LNG, renewables, hydrogen, energy storage and climate technologies value chains. A large number of features will include specialised zones on the exhibition floor and an easy access conference theatre to optimise the delegate experience.

**BOOK YOUR  
STAND TODAY!**

[sales@lisbonenergysummit.com](mailto:sales@lisbonenergysummit.com)

## Why Exhibit?

The exhibition will provide a world-class environment for the global energy industry to showcase the latest decarbonisation solutions in front of an audience of renewables energy producers, hydrogen developers, LNG & Gas companies, EPCs, infrastructure developers, financiers and investors. Regional and international senior executives and department heads from across the energy sector value chain will convene to explore the latest technologies, research advancements, technical services and product solutions that are helping drive the future of the industry forward.

### Gain Entry Into New Markets

With 10,000+ energy sector professionals expected to attend from 85+ countries, gain direct access to the primary stakeholders involved in detailing upcoming decarbonisation strategies, project plans, budget allocations, timelines, technical challenges and tap into opportunities to win contracts.

### Grow Your Business Network

Lisbon Energy Summit attracts professionals with significant buying power and presents exhibitors with the opportunity to develop strong relationships, discover lucrative business opportunities and strengthen business networks with existing and potential new clients.

### Enhance Brand Recognition

A unique opportunity to differentiate your brand from the competition, showcase your company alongside companies leading the energy transition drive, and create a lasting impression with current and potential customers.

### Launch New Product

Present your company's latest innovations, products, solutions and technical advancements to a captive audience of key stakeholders and business leaders driving the net zero emissions agenda.

### Generate New Business

Showcase your products and solutions to active buyers and influencers who are in search of latest innovations and technical advancements.

# Who Exhibits?

# Exhibitor Profile

## By Level Of Seniority

## By Purchasing Authority

## Previous Exhibitors Include

# Partner With The Lisbon Energy Summit

## Promote Your Company On A Global Platform

As a partner of the Lisbon Energy Summit, your company will be positioned alongside the most influential and important thought-leaders shaping global strategies to decarbonise energy systems and drive the energy transition.

Lisbon Energy Summit provides a unique opportunity to reach senior level professionals online and face-to-face, through a highly effective event platform. Partnering or sponsoring the Summit will enable your company to deliver key messages and position them as an industry leader in front of a global audience.

## 5 Reasons To Partner With The Lisbon Energy Summit

# 1

### Launch Your Products & Showcase Innovations

Lisbon Energy Summit attendees are industry decision makers, purchasers and influencers seeking the latest business enhancing technologies and innovative products.

# 2

### Make Sales & Business Transactions

Face-to-face events are a key channel for high-profit business transactions and the Lisbon Energy Summit will put you amongst the key investment and policy decisions that take place. Position your brand in front of international delegates and explore new business opportunities.

# 3

### Gain Global Exposure

With more than 100 countries represented, Lisbon Energy Summit is a truly global event, providing unprecedented opportunities to connect with both existing and new customers.

# 4

### Converse, Collaborate & Connect

Lisbon Energy Summit will connect your company with the industry's most important stakeholders, enabling you to forge new partnerships, capitalise on growth opportunities and demonstrate your business strength, innovation and expertise.

# 5

### Be Part Of The Leading Energy Transition Event

Lisbon Energy Summit sits at the heart of the energy transition conversation. Lisbon Energy Summit will be the biggest opportunity in 2023 to connect with the entire Gas, LNG and Energy value chain.

To discuss your requirements and for more information on branding, networking & thought-leadership opportunities, contact us on:
